

INARCO® FR-11B

INARCO® FR-11B FR-11B is a VOC-free product for use in floor cleaning, both manually and mechanically. Among other things, it also removes cured and dried 2K varnishes and adhesives and, due to its viscous properties, can be applied thickly in spots for particularly stubborn stains.

Fields of application:

Paints, varnishes and adhesives, especially in the dried or cured state.

Application:

- manually with a scrubbing brush or edge cleaner; wipe down damp with water (preferably with a microfiber flat mop for the shortest possible drying times)
- mechanically with an automatic scrubber-dryer or a single-disc machine; if a single-disc machine is used, wipe down either manually or with a wet vacuum cleaner

Properties:

- very high efficiency, comparable with solvents such as acetone, thinner, etc.
- no losses due to evaporation, no odor nuisance
- non-flammable
- no additional VOC emission
- no hazardous material, high environmental and occupational safety
- not suitable for solvent-sensitive materials (check material compatibility beforehand!)
- foam-free

Application concentration:

- manually: pure
- mechanically: addition of 10-50% water
(for 10l INARCO FR11B 1-5l water)

Application temperature:

- cold

pH-value:

- pH-value (10% dilution) 7.0 – 8.0

Suitable for:

Check soil material for compatibility beforehand in an inconspicuous place

Disclaimer

All information about the product is based on the present state of knowledge. However, the information does not exempt the user from obtaining knowledge regarding material compatibility and effectiveness through his own tests. The demands on the product are very individual and can therefore not be generalized. Therefore, no warranty or liability claims can be made.
