

# INARCO® FR-11B

INARCO® FR-11B is a VOC-free product for use in floor cleaning, both manually and mechanically. Among other things, it also removes cured and dried 2K varnishes and adhesives, and its viscous properties make it suitable for thick spot application for particularly stubborn stains.

The product contains an anti-slip component for greater work safety.

## **Field of application:**

Paints, varnishes and adhesives, especially in the dried or cured state.

## **Application:**

- manually with a scrubbing brush or edge cleaner; wipe down damp with water (preferably with a microfiber flat mop for the shortest possible drying times)
- mechanically with an automatic scrubber-dryer or a single-disc machine; if a single-disc machine is used, wipe down either manually or with a wet vacuum cleaner

## **Properties:**

- o very high efficiency, comparable with solvents such as acetone, thinner, etc.
- o no losses due to evaporation, no odor nuisance
- o non-flammable
- o no additional VOC emission
- o no hazardous material, high environmental and occupational safety
- o not suitable for solvent-sensitive materials (check material compatibility beforehand!)
- o foam-free

## **Application concentration:**

- o manual: pure
- o by machine: addition of 10-50% water  
(to 10l INARCO FR11B 1-5l water)

## **Application temperature:**

- o Cold

## **pH-value:**

- o pH-value (10% dilution) 7.0 – 8.0

## **Suitable for:**

Check soil material for compatibility beforehand at an inconspicuous spot

## **Disclaimer**

Any informations about our products are based on the current state of knowledge. The informations doesn't free the user of own tests to achieve knowledge of compatibility of material and performance of the products. Demands on products are individual different and can not be generalized. Therefore, there is no right to guaranty and warranty claims
